SHANTI NIKETAN COLLEGE OF PHARMACY
Ratti (Mandi) HP

AICTE, New Delhi

Approved by: PCI, New Delhi
HP Govt.

Affiliated to: HP Takniki Shiksha Board, Dharamshala

SYLLABUS OF
DIPLOMA IN PHARMACY
Diploma in Pharmacy Part-I (First Year)

1.1 PHARMACEUTICS-I

THEORY

1. Introduction of different dosage forms: Their classification with their examples-their relative applications. Familiarization with new drug delivery systems.

2. Introduction to Pharmacopeias with special reference to the Indian Pharmacopoeia.

4. Packaging of pharmaceuticals: Desirable features of a container and types of containers. Study of glass & plastics as materials for containers and rubber as a material for closure-their merits and demerits. Introduction to aerosol packaging.

5. Size reduction: Objectives and factors affecting size reduction, methods of size reduction - study of Hammer mill, ball mill, Fluid energy mill and Disintegrator.

7. Mixing and Homogenization: Liquid mixing and powder mixing, mixing of semisolids. Study of Silverson Mixer-Homogenizer, planetary Mixer; Agitated powder mixer; Triple Roller Mill; Propeller Mixer, colloid Mill and Hand Homogeniser. Double cone mixer.

9. Extraction and Galenicals:
   (a) Study of percolation and maceration and their modification, continuous hot extraction- Application in the preparation of tinctures and extracts.
   (b) Introduction to Ayurvedic dosage forms.

11. Distillation: Simple distillation and Fractional distillation, steam distillation and vacuum distillation. Study of vacuum still, preparation of purified water I.P. Construction and working of the still used for the same.

12. Introduction to drying process: Study of Tray Dryers; Fluidized Bed Dryer, Vacuum Dryer and Freeze Dryer.

13. Sterilization-Concept of sterilization and its differences from disinfections-Thermal resistance of microorganisms. Detailed study of the following sterilization process.
   1. Sterilization with moist heat
   2. Dry heat sterilization
   3. Sterilization by radiation
   4. Sterilization by filtration
   5. Gaseous sterilization.

   Aseptic techniques: Applications of sterilization process in hospitals particularly with reference to surgical dressings and intravenous fluids. Precautions for safe and effective handling of sterilization equipment.

14. Processing of Tablets: Definition; different type of compressed tables and their properties. Processes involved in the production of tablets; Tablets excipients; Defects in tablets; Evaluation of Tablets; Physical standards including Disintegration and Dissolution. Tablet coating-sugar coating; films coating, enteric coating and micro-encapsulation (Tablet coating may be dealt in elementary manner)
15. Processing of Capsules: Hard and soft gelatin capsules; different sizes of capsules; filling of capsules; handling and storage of capsules. Special applications of capsules.

16. Study of immunological products like sera, vaccines, toxoids & their preparations.

**PRACTICAL (100 hours)**

Preparation (minimum number stated against each of the following categories illustrating different techniques involved.

1. Aromatic waters 2
2. Solutions 4
3. Spirits 2
4. Tinctures 4
5. Extracts 2
6. Creams 2
7. Cosmetic preparations 3
8. Capsules 2
9. Tablets 2
10. Preparations involving sterilisation 2
11. Ophthalmic preparations 2
12. Preparations involving aseptic techniques 2

---

**1.2 PHARMACEUTICAL CHEMISTRY-I**

**THEORY**

1. General discussion on the following inorganic compounds including important physical and chemical properties, medicinal and pharmaceutical uses storage conditions and chemical incompatibility.

A. Acids, bases and buffers: Boric acid, Hydrochloric acid, Strong Ammonium hydroxide, Calcium hydroxide, Sodium hydroxide and official buffers.

B. Antioxidants: Hypophosphorous acid, Sulphur dioxide, Sodium bisulphate, Sodium meta-bisulphite, Sodium thiosulphate, Nitrogen and Sodium nitrite.

C. Gastrointestinal agents:
   1. Acidifying agents- Dilute Hydrochloric acid.
   2. Antacids- Sodium bicarbonate, Aluminum hydroxide gel, Aluminum phosphate, Calcium carbonate, Magnesium carbonate, Magnesium trisilicate, Magnesium oxide, Combinations of antacid preparations.
   3. Protective and Adsorbents- Bismuth sub carbonate and Kaolin.
   4. Saline cathartics- Sodium potassium tartrate and Magnesium sulphate.

D. Topical Agents:
   1. Protective- Talc, Zinc Oxide, Calamine, Zinc stearate, Titanium dioxide, silicone polymers.
   3. Sulphur and its compounds- Sublimed sulphur, Percipitated sulphur, Selenium sulphide.
   4. Astringents- Alum and Zinc Sulphate.

E. Dental Products: Sodium fluoride, Stannous flouride, Calcium fluoride, Calcium carbonate, Sodium meta phosphate, Di-calcium phosphate, Strontium chloride, Zinc chloride.

F. Inhalants- Oxygen, Carbon dioxide, Nitrous oxide.

G. Respiratory stimulants: Ammonium carbonate.

I. Antidotes: Sodium nitrite.
2. Major Intra and Extra cellular electrolytes:
   A. Electrolytes used for replacement therapy- Sodium chloride and its preparations, Potassium chloride and its preparations.
   B. Physiological acid-base balance and electrolytes used- Sodium acetate, Potassium Acetate, Sodium bicarbonate Inj., Sodium citrate, Potassium citrate, Sodium lactate injection, Ammonium chloride and its injection.
   C. Combination of oral electrolyte powders and solutions.
3. Inorganic official compounds of Iron, Iodine and Calcium, Ferrous Sulphate and Calcium Gluconate.
5. Quality control of Drugs and pharmaceuticals: Importance of quality control, significant errors, methods used for quality control, sources of impurities in pharmaceuticals. Limit tests for Arsenic, Chloride, Sulfate, Iron and Heavy metals.
6. Identification tests for cations and anions as per Indian Pharmacopoeia.

PRACTICAL

1. Identification tests for inorganic compounds particularly drugs and pharmaceuticals.
2. Limit test for chloride, Sulfate, Arsenic, Iron and Heavy metals.
3. Assay of inorganic pharmaceuticals involving each of the following methods of compounds marked with (*) under theory.
   a) Acid-Base titrations(at least 3)
   b) Redox titrations (one each of permanganometry and iodimetry).
   c) Precipitation titrations (at least 2)
   d) Complexometric titration (Calcium and Magnesium).

1.3 PHARMACOGNOSY
THEORY

1. Definition, history and scope of Pharmacognosy including indigenous system of medicine.
2. Various systems of classification of drugs of natural origin.
3. Adulteration and drug evaluation; significance of Pharmacopoeial standards.
4. Brief outline of occurrence, distribution, outline of isolation, identification tests, therapeutic effects and pharmaceutical application of alkaloids, terpenoids, glycosides, volatile oils, tannins and resins.
5. Occurrence, distribution, organoleptic evaluation, chemical constituents including tests wherever applicable and therapeutic efficacy of following categories of drugs.
   (a) Laxatives: Aloes, Rhubarb, Castor oil, Ispaghula, Senna.
   (b) Cardiotonics- Digitalis, Arjuna.
   (c) Carminatives & G.I. regulators: Umbelliferous fruits, Coriander, Fennel, Ajowan, Cardamom, Ginger, Black pepper, Asafoetida, Nutmeg, Cinnamon, Clove.
   (d) Astringents- Catechu.
   (e) Drugs acting on nervous system: Hyoscyamus, Belladonna, Aconite, Ashwagandha, Ephedra, Opium, Cannabis, Nux-vomica.
   (f) Antihypertensive- Rauwolfia.
   (g) Antitussives- Vasaka, Tolu balsam, Tulsi.
(h) **Antirheumatics** - Guggal, Colchicum.
(i) **Antitumour** - Vinca.
(j) **Antileprotics** - Chaulmoogra oil.
(k) **Antidiabetics** - Pterocarpus, Gymnema sylvestro.
(l) **Diuretics** - Gokhru, Punarnava.
(m) **Antidysenteries** - Ipecacuanha.
(n) **Antiseptics and disinfectants** - Benzoin, Myrrh, Neem, Curcuma.
(o) **Antimalariais** - Cinchona.
(p) **Oxytocics** - Ergot.
(q) **Vitamins** - Shark liver oil and Amla.
(r) **Enzymes** - Papaya, Diastase, Yeast.
(s) **Perfumes and flavoring agents** - peppermint oil, Lemon oil, Orange oil, lemon grass oil, sandal wood.
(t) **Pharmaceutical aids** - Honey, Arachis oil, starch, kaolin, pectin, olive oil. Lanolin, Beeswax, Acacia, Tragacanth, sodium Alginate, Agar, Guar gum, Gelatin.
(u) **Miscellaneous** - Liquorice, Garlic, picrorhiza, Diascorea, Linseed, shatavari, Shankpushpi, pyrethrum, Tobacco.

6. Collection and preparation of crude drugs for the market as exemplified by ergot, opium, rauwolfia, digitalis and senna.
7. Study of source, preparation and identification of fibers used in sutures and surgical dressings - cotton, silk, wool and regenerated fibers.
8. Gross anatomical studies of Senna, Datura, Cinnamon, Cinchona, Coriander, Fennel, Clove, Ginger, Nux-vomica, Ipecacuanha.

**PRACTICAL**

1. Identification of drugs by morphological characters.
2. Physical and chemical tests for evaluation of drugs wherever applicable.
3. Gross anatomical studies (t.s.) of the following drugs: Senna, Datura, Cinchona, Fennel, Clove, Ginger, Nux-vomica, Ipecacuanha.
4. Identification of fibers and surgical dressing.

**1.4 BIOCHEMISTRY AND CLINICAL PATHOLOGY**

**THEORY**

1. **Introduction to Biochemistry.**
2. Brief chemistry and role of proteins, polypeptides and amino acids, classification, Qualitative tests, Biological value, Deficiency diseases.
3. Brief chemistry and role of carbohydrates, classification, qualitative tests, Diseases related to carbohydrate metabolism.
4. Brief chemistry and role of lipids, classification and qualitative tests. Diseases related to lipids metabolism.
5. Brief chemistry and role of vitamins and coenzymes
6. Role of minerals and water in life processes.
7. **Enzymes:** Brief concept of enzymatic action factors affecting it. Therapeutic and pharmaceutical importance.
9. Introduction to pathology of blood and urine
   a) Lymphocytes and platelets, their role in health and disease
   b) Erythrocytes-Abnormal cells and their significance

5 | Shanti Niketan College of Pharmacy, Ratti (Mandi) HP
c) Abnormal constituents of urine and their significance in diseases.

PRACTICAL

2. Analysis of normal and abnormal constituents of Blood and Urine (Glucose, urea, creatine, cretinine, cholesterol, alkaline phosphatase, acid phosphatase, Bilirubin, SGPT, SGOT, calcium, Diastase, Lipase).
3. Examination of sputum and faeces (microscopic & staining).
4. Practice in injecting drugs by intramuscular, subcutaneous and intravenous routes, withdrawal of blood samples.

1.5 HUMAN ANATOMY AND PHYSIOLOGY

THEORY

1. **Scope of Anatomy and physiology**: Definition of various terms used in Anatomy.
2. Structure of cell, function of its components with special reference to mitochondria and microsomes.
3. **Elementary Tissues**: Elementary tissues of the body, i.e. epithelial tissue, muscular tissue, connective tissue and nervous tissue.
6. Name and functions of lymph glands.
8. Various parts of respiratory system and their functions, physiology of respiration.
10. Structure of skeletal muscle, physiology of muscle contraction. Names, positions, attachments and functions of various skeletal muscles. Physiology of neuromuscular junction.
11. Various parts of central nervous system, brain and its parts, functions and reflex action. Anatomy and physiology of autonomic nervous system.
12. Elementary knowledge of structure and functions of the organs of taste, smell, ear, eye and skin. Physiology of pain.
13. Digestive system:-Names of various parts of digestive system and their functions. structure and functions of liver, physiology of digestion and absorption.
14. Endocrine glands and Hormones. Location of glands, their hormones and functions.
15. Reproductive System: Physiology and Anatomy of Reproductive system.

PRACTICAL

1. Study of the human Skelton.
2. Study with the help of charts and models of the following system and organs:
   a) Digestive system
   b) Respiratory system
   c) Cardiovascular system
   d) Urinary system
e) Reproductive system  

f) Nervous system  

g) Ear  

h) Eye  

3. Microscopic examination of epithelial tissue, cardiac muscle, smooth muscle, skeletal muscle. Connective tissue and nervous tissues.  

4. Examination of blood films for TLC.DLC and malarial parasite.  

5. Determination of RBCs, clotting time of blood, erythrocyte sedimentation rate and Hemoglobin value.  

6. Recording of body temperature, pulse, heart-rate, blood pressure and ECG.  

1.6 HEALTH EDUCATION AND COMMUNITY PHARMACY  

THEORY  

1. Concept of health: Definition of physical health, mental health, social health, spiritual health determinants of health, indicators of health, concept of disease, natural history of diseases, the disease agents, concept of prevention of diseases.  

2. Nutrition and health: Classification of foods, requirements, diseases induced due to deficiency of proteins, vitamins and minerals-treatment and prevention.  

3. Demography and family planning: Demography cycle, fertility, family planning, contraceptive methods, behavioral methods, hormonal contraceptives, population problem of India.  

5. Environment and health: Source of water supply, water pollution, purification of water, health and air, noise, light-solid waste disposal and control-medical entomology, arthropod borne diseases and their control, rodents, animals and diseases.  

6. Fundamental principles of microbiology: Classification of microbes, isolation, staining techniques of organisms and prevention.  

7. Communicable diseases: Causative agents, mode of transmission and prevention.  

a) Respiratory infections: chicken pox, measles, influenza, diphtheria, whooping cough and tuberculosis.  

b) Intestinal infection: poliomyelitis, Hepatitis, cholera, Typhoid, food poisoning, Hookworm infection.  

c) Arthropod borne infections: plague, Malaria, filariases.  

d) Surface infection: Rabies, Trachoma, Tetanus, Leprosy.  

e) Sexually transmitted diseases: Syphilis, Gonorrhoea, AIDS.  

1.6 BASIC COMPUTER APPLICATION-1  

THEORY  

| Shanti Niketan College of Pharmacy, Ratti (Mandi) HP | 7 |
Familiarization with computer Hardware:

1. Block diagram of computer system and its working.
2. Various input/output device of computer system.
3. Memory (primary and secondary type of computer: micro(UC, PC-XT, PC-AT))
4. Interconnecting various external units including computer.

Familiarization with computer software:

1. Introduction to operating system $ its importance.
2. Types of software (system software, application software)
4. Booting a computer system. (Cold boot & warm Boot).
5. Introduction to file & directories.

Introduction to DOS:

1. Internal & External DOS Commands.
2. Creating & working with files & directories.
3. Formatting Floppies & Hard Disks.

Introduction to Windows (Windows 98 onwards):

1. Graphical User interface.
2. Common GUI Terms.
   a. Pointing device (use of mouse & its function)
   b. Menu bar, pull-down menu, pop-up menu.
   c. Dialog boxes, button, sliders, and checkboxes.
   d. Icon (shortcuts, folders).
3. MS – windows 98.
   b. Structure of a window.
   c. Basic Techniques for working in windows.
4. Starting windows 98.
   a. Task bar.
   b. Start menus.
   c. Shortcut menus.
   d. Shut Down.
5. Management system in windows
   a. My computer
   b. System Setting (control panel & printing Setting)
   c. Backup your data
6. **File & Folder**
   a. Windows explorer
   b. Various file operations (File Naming, Finding, Creating, copy /move, deleting)
   c. Various folder operations (folder creating, renaming, creating, moving, deleting, viewing
   d. Recycle bin

7. **Program & accessories**
   a. Run a program
   b. General use (calculator, word pad, note pad, paint program)

8) **Introduction of computer network & terminology**
   i) network concept, topologies & classification
   a) LAN
   b) WAN
   c) MAN
   ii) Internet basics
   a) Various services on internet (Email, Usenet, FTP, Telnet, WWW, Navigator/ browser)
   b) Internet Protocol

6) **Working with MS – Word:**
   i) Various operations on document (such as open, save, print, page setup)
   iii) Document alignment creating bullets & number list
   iv) Setting font, size, style.
   v) Proofing tools (spell checker & checking grammar)
   vi) Formatting paragraph (alignment, line & paragraph spacing, border & shading)
   vii) Mail merge on document.

7. **Working with MS-excel:**
   i. Creating a worksheet.
   ii. Editing typing data, coping moving.
   iii. Using various formulas in worksheet,
   iv. Creating various types of graphs.
   v. Printing worksheet.

8. **Working with access:**
   i. About access.
   ii. Creating data bases.
   iii. Creating forms.
   iv. Creating reports.
   v. Printing reports.
1. Familiarization with PC, Connecting & disconnection of Keyboard, Monitor, Printer, Correct methods of handling of Floppies & mouse.

2. Practicing on Windows 98 (creating shortcuts, folder, file, note pad, paint program etc.)

4. Prepare Worksheet, Table & Graphs.

5. Practical with MS-Access.

6. Browsing and using other services such as Email & FTP on Internet.
Diploma in Pharmacy Part-I (Second Year)

2.1 PHARMACEUTICS-II
THEORY

1. Dispensing Pharmacy:
   (I). Prescriptions: Reading and understanding of prescriptions; Latin terms commonly used (Detailed study is not necessary), Modern methods of prescribing, adoption of metric system. Calculations involved in dispensing.
   (II). Incompatibilities in prescriptions: study of various types of incompatibilities—physical, chemical and therapeutic.
   (III). Posology: Dose and dosage of drugs, factors influencing dose, calculations of doses on the basis of age, sex, surface area and veterinary doses.

2. Dispensed Medications: (Note: A detailed study of the following dispensed medication is necessary. Methods of preparation with theoretical and practical aspects, use of appropriate containers and closures. Special labeling requirements and storage conditions should be high-lighted).
   (I). Powders: Type of powders—Advantages and disadvantages of powders, Granules, cachets and tablet triturates. Preparation of different types of powders encountered in prescriptions. Weighing methods, possible errors in weighing, minimum weighable amounts and weighing of a material below the minimum weighable amount, geometric dilution and proper usage and care of dispensing balance.
   (II). Liquid oral Dosage forms:
   a. Monophasic—Theoretical aspects including commonly used vehicles, essential adjuvant like stabilizers, colorants and flavors, with examples.
      Review of the following monophasic liquids with details of formulation and practical methods.

<table>
<thead>
<tr>
<th>Liquids for internal administration</th>
<th>Liquids for external administration or used on mucous membranes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mixtures and concentrates</td>
<td>Gargles</td>
</tr>
<tr>
<td>Syrups</td>
<td>Mouth washes, Throat-paints, Douches</td>
</tr>
<tr>
<td>Elixirs</td>
<td>Ear Drops, Nasal drops/sprays, Liniments, Lotions</td>
</tr>
</tbody>
</table>

   b. Biphasic Liquid Dosage Forms:
      i. Suspensions: (elementary study) Suspensions containing diffusible solids and liquids and their preparations. Study of the adjuvant used like thickening agents, wetting agents, their necessity and quantity to be incorporated suspensions of precipitate forming liquids like tinctures, their preparations and stability suspensions produced by chemical reaction. An introduction to flocculated/non-flocculated suspension system.
      ii. Emulsions: Types of emulsions, identification of emulsion system, formulation of emulsions, selection of emulsifying agent. Instabilities in emulsions, preservation of emulsions.
   c. Semi-Solid Dosage Forms:
      i. Ointments: Types of ointments, classification and selection of dermatological vehicles. Preparation and stability of ointments by the following processes:
         a. Trituration
         b. Fusion
         c. Chemical reaction
         d. Emulsification.
ii. **Pastes:** Differences between ointments and pastes, Bases of pastes. Preparation of pastes and their preservation.

iii. **Jellies:** An introduction to the different types of jellies and their preparation.

iv. An elementary study of poultice.

v. **Suppositories and passaries:** Their relative merits and demerits, types of suppositories, suppository bases, classification, properties, preparation and packing of suppositories. Use of suppositories of drug absorption.

3. **Dental and cosmetic preparations:** Introduction to Dentifrices, facial cosmetics, Deodorants. Antiperspirants, shampoo, Hair dressings and Hair removers.

4. **Sterile Dosage forms:**
   a. **Parenteral dosage forms:** Definition, General requirements for parenteral dosage forms. Types of parenteral formulations, vehicles, adjuvant, processing and personnel, Facilities and quality control. Preparation of Intravenous fluids and admixtures - Total parenteral nutrition, Dialysis fluids.
   b. **Sterility testing:** particulate matter monitoring - Faculty seal packaging.
   c. **Ophthalmic products:** study of essential characteristics of different ophthalmic preparations. Formulation: additives, special precautions in handling and storage of ophthalmic products.

**PRACTICAL**

Dispensing of at least 100 products covering a wide range of preparations such as mixtures, emulsion, solutions,liniments, E.N.T. preparations. Ointments, suppositories, powders, incompatible prescriptions etc.

**2.2 PHARMACEUTICAL CHEMISTRY-II**

**THEORY**

1. Introduction to the nomenclature of organic chemical systems with particular reference to hetero-cyclic system containing up to 3 rings.

2. The chemistry of following pharmaceutical organic compounds covering their nomenclature, chemical structure, uses and the important physical and chemical properties (chemical structure of only those compounds marked with asterisk (*). The stability and storage conditions and the different type of pharmaceutical formulations of these drugs and their popular brand names:

1. **Antiseptics and Disinfectants:** Proflavine*, Benzalkonium chloride, Cetrime, Chlorocresol, chloroxylenol, Formaldehyde solution, Hexachlorophene, Liquefied phenol, Nitrofurantoin.

2. **Sulphonamides:** Sulphasuxazole, Sucinylsulphathiazole, Sulphadimethoxine, sulphanethoxy pyridazine, sulphamethoxazole, Co-trimoxazole, sulfacetamide*

3. **Antileprotic Drugs:** Clofazimine, Thiambutosine, Dapsone*, solapsone.

4. **Anti-tubercular Drugs:** Isoniazid*, PAS*, Streptomycin, Rifampicin, Ethambutol*, Thiacetazone, Ethionamide, cycloserine, pyrazinamide*.

5. **Antimoebic and Anthelmintic Drugs:** Emetine, Metronidazole, Halogenated hydroxyquinolines, Diloxanide furoate, Paromomycin*, Piperazine*, Mebendazole, D.E.C.*

7. **Antifungal agents:** Udecylenic acid, Tolnaftate, Nystatin, Amphotericin, Hamycin.

8. **Antimalarial Drugs:** Chloroquine*, Amodiaquine, Primaquine, Proguanil, Pyrimethamine*, Quinine, Trimethoprim.

11. **General Anaesthetics**: Halothane*, Cyclopropane*, Diethyl ether*, Methohexital sodium, Thiopental sodium, Trichloroethylene
12. **Antidepressant Drugs**: Amitriptyline, Nortryptiline, Imperamine*, Pheipelzine, Tranilcypramine.
16. **Cholinergic Drugs**: Neostigmine*, Pyridostigmine, Pralidoxime, Pilocarpine, Physostigmine*.
17. **Cholinergic Antagonists**: Atropine*, Hyoscine, Homatropine, Propantheline*, Benztonpine, Tropicamide, Biperiden*.
19. **Cardiovascular Drugs**: Ethylnitrite*, Glycerol trinitrate, Alpha methyl dopa, Guanethidine, Clofibrate, Quinidine.
21. **Coagulants and Anti coagulants**: Heparin, Thrombin, Menadione*, Bisphodirxy-coumarin, Warfarin sodium.[3 h]
22. **Local Anaesthetics**: Lignocaine*, Procaine*, Benzocaine.
23. **Histamine and anti Histaminic Agents**: Histamine, Diphenhydramine*, Promethazine, Cyproheptadine, Mepyramine*, Pheniramine, Chlorpheniramine*.
25. **Thyroxine and Antithyroids**: Thyroxine*, Methimazole, Methyl thiouracil, Propylthiouracil.
27. **Anticonvulsants, cardiac glycosides, Antiarrhythmic, Antihypertensives & Vitamins**.
28. **Steroidal Drugs**: Betamethasone, Cortisone, Hydrocortisone, Prednisolone, Progesterone, Testosterone, Oestradiol, Nandrolone.
29. **Anti-Neoplastic Drugs**: Actinomycin, Azathioprine, Busulphan, Chloramubucil, Cisplatin, Cyclophosphamide, Daunorubicin Hydrochloride, Fluorouracil, Mercaptopurine, Methotrexate, Mytomycin.

**PRACTICAL**

1. Systematic qualitative testing of organic drugs involving solubility determination, melting point and/or boiling point, detection of elements and functional groups (10 compounds).
2. **Introduction** to pharmacology, scope of pharmacology.
4. **General mechanism of drugs action** and their factors which modify drugs action.
5. Pharmacological classification of drugs. The discussion of drugs should emphasize the following aspects:
i) **Drugs acting on the central Nervous system:**
   a. General anaesthetics- adjunction to anaesthesia, intravenous anaesthetics.
   c. Centrally acting muscle relaxants and anti parkinsonism agents.

ii) Local anaesthetics.

iii) Drugs acting on autonomic nervous system.
   a. Cholinergic drugs, Anticholinergic drugs, anticholinesterase drugs.
   b. Adrenergic drugs and adrenergic receptor blockers.
   c. Neurone blockers and ganglion blockers.
   d. Neuromuscular blockers, used in myasthenia gravis.

iv) Drugs acting on eye: Mydriatics, drugs used in glaucoma.

v) **Drugs acting on respiratory system:** Respiratory stimulants, Bronchodilators, Nasal decongestants, Expectorants and Antitussive agents.

vi) **Antacids:** Physiological role of histamine and serotonin, Histamine and Antihistamines, prostaglandins.

vii) Cardio vascular drugs: Cardiotonics, Antiarrhythmic agents, Anti-anginal agents, Antihypertensive agents, peripheral Vasodilators and drugs used in atherosclerosis.

viii) Drugs acting on the blood and blood forming organs. Haematinics, coagulants and anticoagulants, Haemostatic, Blood substitutes and plasma expanders.

ix) **Drugs affecting renal function:** Diuretics and anti-diuretics.

x) **Hormones and hormone antagonists**- Hypoglycemic agents, Anti--thyroid drugs, sex hormones and oral contraceptives, corticosteroids.

xi) **Drugs acting on digestive system:** Carminatives digest ants, Bitters, Antacids and drugs used in peptic ulcer, purgatives, and laxatives, Antidiarrohoeals, Emetics, Anti-emics, and Antispasmodics.

xii) **Chemotherapy of microbial diseases:** Urinary antiseptics, sulphonamides, penicillin, streptomycin, Tetracyclines and other antibiotics. Anti-tubercular agents, Antifungal agents, antiviral drugs, antileprotic drugs.

xiii) **Chemotherapy of protozoal diseases:** Anthelmintic drugs.

xiv) **Chemotherapy of cancer**.

xv) **Disinfectants and antiseptics**.

**Note:** A detailed study of the action of drugs on each organ is not necessary.

**PRACTICAL**

The first six of the following experiments will be done by the students while the remaining will be demonstrated by the teacher.

1. Effect of potassium and calcium ions, acetylcholine and adrenaline on frog's heart.
2. Effect of acetyl choline on rectus abdomens muscle of frog and guinea pig ileum.
3. Effect of spasmogens and relaxants on rabbits intestine.
4. Effect of local anaesthetics on rabbit cornea.
5. Effect of mydriatics and miotics on rabbit's eye.
6. To study the action of strychnine on frog.
7. Effect of digitalis on frog's heart.
8. Effect of hypnotics in mice.
9. Effect of convulsants and anticonvulsant in mice or rats.
10. Test for pyrogens.
11. Taming and hypnosis potentiating effect of chlorpromazine in mice/rats.
12. Effect of Diphenhydramine in experimentally produced asthma in guinea pigs.

2.4 PHARMACEUTICAL JURISPRUDENCE
THEORY

2. Principles and significance of professional Ethics. Critical study of the code of pharmaceutical Ethics drafted by pharmacy council of India.

4. The Drugs and Cosmetics Act, 1940- General study of the Drugs and cosmetics Act and the Rules there under. Definitions and salient features related to retail and whole sale distribution of drugs. The powers of Inspectors, the sampling procedures and the procedure and formalities in obtaining licenses under the rule. Facilities to be provided for running a pharmacy effectively. General study of the schedules with special reference to schedules C, C-1, F, G, J, H, P and X and salient features of labeling and storage conditions of drugs.

5. The Drugs and Magic Remedies (objectionable Advertisement) Act, 1954 - General study of the Act, objectives, special reference to be laid on Advertisements, magic remedies and objections1 and permitted advertisements -diseases which cannot be claimed to be cured.

7. Brief introduction to the study of the following acts:
   1) Latest Drugs (price control) order in force.
   2) Poisons Act 1919(as amended to date)
   3) Medicinal and Toilet preparations (excise Duties) Act, 1955 (as amended to date).
   4) Medical Termination of Pregnancy Act, 1971(as amended to date).

2.5 DRUG STORE AND BUSINESS MANAGEMENT
THEORY

Part I Commerce

1. Introduction-Trade, Industry and commerce, Functions and subdivision of commerce, Introduction to Elements for Economics and Management.

2. Forms of Business Organizations

4. Drug House Management- selection of site, space Lay-out and legal requirements. Importance and objectives of purchasing, selection of suppliers, credit information, tenders, contracts and price determination and legal requirements thereto. Codification, handling of drug stores and other hospital supplies.

5. Inventory Control-objects and importance, modern techniques like ABC,VED analysis, the lead time, inventory carrying cost, safety stock, minimum and maximum stock levels, economic order quantity, scrap and surplus disposal.

Part II Accountancy
8. **Introduction to the accounting** concepts and conventions. Double entry Book Keeping, Different kinds of accounts.
12. Simple techniques of analyzing financial statements. Introduction to Budgeting.

2.6 **HOSPITAL AND CLINICAL PHARMACY**

**THEORY**

**Part-I: Hospital Pharmacy**

1. **Hospital**-Definition, Function, classifications based on various criteria, organization, Management and health delivery system in India.
2. **Hospital Pharmacy**:  
   a. Definition  
   b. Functions and objectives of Hospital pharmaceutical services.  
   c. Location, Layout, Flow chart of materials and men.  
   d. Personnel and facilities requirements including equipments based on individual and basic needs.  
   e. Requirements and abilities required for Hospital pharmacists.
3. **Drug Distribution system in Hospitals**:  
   a. Out-patient service  
   b. In-patient services- Types of services detailed discussion of unit Dose system, Floor ward stock system, satellite pharmacy services, central sterile services, Bed side pharmacy.
4. **Manufacturing**:  
   a. Economical considerations, estimation of demand.  
   b. **Sterile manufacture**-Large and small volume parenterals, facilities, requirements, layout production planning, man-power requirements.  
   c. **Non-sterile manufacture**-Liquid orals, externals, Bulk concentrates.  
   d. Procurement of stores and testing of raw materials.  
   e. Nomenclature and uses of surgical instruments and Hospital Equipments and health accessories.
5. **P.T.C.(Pharmacy Therapeutic Committee)**
6. **Hospital Formulary system** and their organization, functioning, composition.
8. **Surgical dressing** like cotton, gauze, bandages and adhesive tapes including their pharmacopoeial tests for quality. Other hospital supply eg. I.V.sets, B.G. sets, Ryals tubes, Catheters, Syringes, etc.
9. **Application of computers** in maintenance of records, inventory control, medication monitoring, drug information and data storage and retrieval in hospital retail pharmacy establishment.

**Part II: Clinical Pharmacy**

10. **Introduction to Clinical pharmacy practice**: Definition, scope.  
11. **Modern dispensing aspects**- Pharmacists and patient counseling and advice for the use of common drugs, medication history.  
12. **Common daily terminology used in the practice of Medicine**.  
13. **Disease, manifestation and Patho-physiology** including salient symptoms to understand the disease like Tuberculosis, Hepatitis, Rheumatoid Arthritis, Cardio-vascular diseases, Epilepsy, Diabetes, Peptic Ulcer, Hypertension.
14. **Physiological parameters with their significance.**
15. **Drug Interactions:**
a. Definition and introduction.
d. Drug-food interaction.

16. Adverse Drug Reaction:
   a. Definition and significance.
   b. Drug-Induced diseases and Teratogenicity.

18. Drug dependences, drug abuse, addictive drugs and their treatment, complications.

PRACTICAL

1. Preparation of transfusion fluids.
2. Evaluation of surgical dressings.
3. Sterilization of surgical instruments, glass ware and other hospital supplies.
4. Handling and use of data processing equipments

2.7 BASIC COMPUTER APPLICATION-II
THEORY
1. Introduction to C:

1.1 Introduction to C:
  1.1.1 Statement
  1.1.2 Algorithm
  1.1.3 Flowchart
  1.1.4 Program
  1.1.5 Procedural Programming
  1.1.6 Structural Programming
  1.1.7 Program problem solving approach

1.2 Data types, Operators and Statement
  1.2.1 Identifiers and Keywords
  1.2.2 Constant
  1.2.3 String Constants
  1.2.4 Numeric Constant
  1.2.5 Character Constants
  1.2.6 C++ Operator
    1.2.6.1 Arithmetic Operator
    1.2.6.2 Assignment Operator
    1.2.6.3 Comparison & Logical Operator
    1.2.6.4 Bitwise Logical Operator
  1.2.7 Type Conversion

1.3 Written a simple program in C++
  1.3.1 Declaration of Variables
  1.3.2 Statements
  1.3.3 Keyboard & Screen I/O
  1.3.4 Manipulation Function
  1.3.5 Input & Output(I/O) Stream Flags

1.4 Control Statement:
  1.4.1 Conditions Expression
    1.4.1.1 If Statement
    1.4.1.2 If else Statement
  1.4.2 Switch Statements
  1.4.3 Breaking Control Statement
    1.4.3.1 Break Statement
    1.4.3.2 Continue Statements
    1.4.3.3 Go to Statements
  1.4.4 Loop Statement
    1.4.4.1 Loop Statement
    1.4.4.2 For Loop
    1.4.4.3 While Loop
    1.4.4.4 Do While Loop
2 Visual Fox-Pro

2.1 Introduction to data bases and tables, forms, reports, menu system.
2.2 Creating tables, Deleting, adding and editing records, creating projects.
2.3 Using the form Wizards, form design without form wizard, controlling the appearance of the text, adding a picture objects, working with sub-forms, putting a list box, selecting and realizing labels and data moving, adding and editing labels, using the rectangle and line tools.
2.4 Finding information in data base and creating simple column report grouped data report, putting a graph on a form.
2.5 Writing Simple menu driven program, creating, executable file in VFP (Visual Fox Pro).

3 Introduction to Web Page:
3.1 Introduction to HTML, DHTML, XML, CGI, ASP
3.2 Designing simple web page using Front page 98 onwards.
   (Using hyper link, image & text)

4 Introduction to E-Commerce Framework:
4.1 Defining electronic Commerce: technology of digital convergence of contents and transmission types of electronics commerce-inter-organisational, E-commerce, EDI over WAN, Extranets, Electronics Fund Transfer, e-mail, Fax, Intra-organisation e-mail, Customer, to Business e-mail, (B2B, B2C, C2C)
4.2 Component of E-Commerce
   - Institution- Government, Merchant, Manufacturers, Suppliers, Consumers, banks, financial institutions
   - Processes-Marketing, Sales, Payment, Fulfillment, Support
   - Network-Corporate, Internet, Commercial

5 Multimedia and Application: Application of multimedia in education, business and games, Multimedia Hardware (introduction and working), sound blaster and video cards, optical drivers, image and sound file formats, compression techniques.

Practical Exercise

(i) Writing simple program using C-Language
(ii) Creating projects in Visual Fox-Pro
(iii) Creating simple Web pages using front page 98
(iv) Using Multimedia CD-ROM's w.r.t. Pharmacy.
